I'm a passionate Web Developer who enjoys learning new technologies to help provide value to Companies or Businesses.

## EXPERIENCE

### TEXTER-RELAY (REAL-TIME CHAT WEB APPLICATION)

This is a room-based web app build using Socket.io for real-time communication, JavaScript for both the Front-end and Back-end using Node.js, HTML5 and CSS3 for styling.

### PORTFOLIO WEBSITE (MY PORTFOLIO WEBSITE)

This is where I show employers what I can offer to their company with the skills I have and willing to learn more. It was build using Node.js and MongoDB for Back-end, HTML5, CSS and Vanilla JavaScript for the Front-end. Also used NodeMailer to send E-mails through my Website.

### KATBOT (CHAT BOT WEB APP)

This is a chat bot that was build using JavaScript regular Expressions to search for the keywords the user may use so that the BOT can respond back appropriately, HTML5 and CSS3 for styling.
